# COLOURS, EFFECTS & MAGIC!

## DISCOVER THE WORLD OF COLOURS & EFFECTS

Vinyl records are more than just music – they are an experience. Beyond the timeless appeal of classic black vinyl, today's records open up a universe of creative possibilities. Choose from a wide range of colours, effects, and exclusive finishes that make each pressing unique.

This catalogue is your guide to inspiration. Explore the many options available, compare styles and effects, and find the perfect match for your music and artwork. And if you are looking for something truly special, we are here to help you create a custom pressing that brings your vision to life.

To design the perfect record, contact us through your preferred option below – we'll be happy to help you find the best solution.

**9216 / Yellow Tint**

**8308 / Yellow**

**9340 / Yellow**  
*Transparent*

## EFFECTS

### SPLATTER VINYL

*Bold contrasts with endless variations.*

Create striking contrasts and unique looks with splatter effects. The record starts with a base colour, onto which one or more splatter colours are applied. For the best result, the base colour should be lighter than the splatter colour. Using a transparent base gives the splatter a slightly three-dimensional appearance.

---

### MARbled VINYL

*Flowing patterns for a natural, organic look.*

Marble effects create depth and beautiful flowing patterns on vinyl. The effect is achieved by combining two or more colours. For the best result, the base colour should be light (preferably transparent), while the marble colour should be darker (preferably opaque).

High contrast between the colours enhances the marbling and makes the effect more striking.

## ECO VINYL

*Sustainable sound with a unique aesthetic.*

The Eco vinyl is made from regranulate and features a natural marble effect. It is usually available in darker shades, and each pressing has a unique colour pattern, depending on the post-production mix. Eco vinyl combines sustainability with a distinctive, collectible look, offering both visual appeal and full playability.

## BI-COLOUR VINYL

*Sharp contrasts or soft blends — your choice.*

Two to four colours are pressed in distinct segments, creating a bold, geometric look. Opaque colours produce sharp dividing edges, while transparent tones yield softer transitions between segments.

## SWIRL VINYL

*Dynamic motion  
frozen in vinyl.*

A mesmerising effect where colours are spun together during pressing. Swirl records often feature high contrast combinations that create dynamic, flowing motion across the surface. No two swirls are alike, making each pressing unique.

---

## COLOUR IN COLOUR VINYL

*A striking core within  
a contrasting shell.*

A dramatic style where a core colour is pressed inside a contrasting outer colour. Both opaque and transparent options are possible, with opaque centres creating a bold statement and transparent combinations producing softer blends.

## MIXED EFFECT VINYL

*Combine effects for a one-of-a-kind creation.*

For the ultimate creative freedom, multiple effects are combined within a single pressing — such as splatter with marble, or glitter with glow in the dark. Each record becomes a one-of-a-kind creation with a look as unique as the music itself.

## LIQUID / LIQUID OIL VINYL

*A collector's dream with moving liquid inside.*

Liquid vinyl is a transparent record containing a filling of coloured liquid or oil, creating a flowing, dynamic effect that appears to move when the disc is tilted. Liquid uses standard coloured liquid for a playful and striking appearance, while Liquid Oil incorporates oil-based inclusions for more pronounced, swirling patterns. Each record is fully playable, combining unique visual appeal with high-quality sound. Every pressing is one-of-a-kind, making it a true collector's item.

### GLITTER VINYL

*Add sparkle and shine to your sound.*

Available in a variety of colours, glitter vinyl creates unique, eye-catching designs.

### UV PRINTED VINYL

*Full-colour artwork printed directly onto vinyl.*

Music is pressed on one side, while high-resolution decorative artwork is printed on the other using UV technology.

### PICTURE DISC VINYL

*Iconic visuals pressed into every groove.*

A picture disc features decorative artwork or a photo alongside the music, combining visuals and sound on both sides of the record.

### GLOW IN THE DARK VINYL

*Your record shines, even in the dark.*

Exposed to artificial or natural light, this vinyl glows in the dark. The glowing granulate can be used alone or mixed with another colour.

### ETCHED VINYL

*Playable sound, visual art.*

One side of the record is engraved with artwork instead of music, turning the disc into a playable work of art.

### DOUBLE SIDED VINYL

*Two looks in one pressing.*

A double-sided record can feature different colours or effects on each side, offering variety and creative expression.
